

React Native Assignment

Please find the mockup on the next page. You can fetch the data from the following api.

The api provides a list of objects which needs to be displayed as per the mockup.

Api - <http://www.mocky.io/v2/5c41920e0f0000543fe7b889>

Each row in the list has

1. Left side placeholder with the first character of 'name' from the api
2. Second column to display information
3. Phone icon on click of which need to show the dialer with the number specified in the api for that enquiry
4. On Click of the row navigate to another page with the same information displayed on it. Use redux to fetch details instead of passing the details using navigation params.

Mandatory - React Native, Redux, React Navigation
